

Post IP

The Future of the Internet

Political Institutional Frame
20th November 2007

- One Internet
- Democratic, cheap and global access for up and downloads
- Multiple applications
- Freedom of choice

Future of the Internet: Assumptions to be discussed

- Democracy of IP Governance
- Broadband access with nearly no limit
- Net Neutrality
- Separation of the infrastructure from services

Future of the Internet: Solutions to be discussed

- Globalisation of Democratic influence on IP
Governance configured by open innovation (multiple locations, ICANN security council, Open Internet Foundation)
- Internet should be not part of the National Regulatory Authorities but they should focus on Net Neutrality
- Open Access and Structural Separation of the infrastructure
- NGN implementation by carriers carrier consolidation

Thank you
